**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 6 is finally rejected under 35 U.S.C. 103(a) as being unpatentable over either Darrah et. al. or Carlson in view of any of Learned, Carr or Yang.

Either Darrah et. al. or Carlson shows the claimed invention except for the use of a convex spring to hold the sleeve in the ratchet wheel. Any of Learned, Carr or Yang suggests that a driver can have such a spring to hold an element in place on or in the tool. It would therefore be obvious to one skilled in the art at the time the invention was made to modify either Darrah et. al. or Carlson by using a spring that is flat and convex because any of Learned, Carr or Yang suggests the use of such a holding spring.

Also, Carlson clearly shows the use of a groove around the sleeve to accept any well known type of holding element, e.g. a ball or an O-ring.

### ***Response to Arguments***

3. Applicant's arguments filed 06 October 2003 have been fully considered but they are not persuasive.

New claim 6 is merely a combination of original claims 1, 4 and 5 and as such the same rejection applies.

Art Unit: 3723

Applicant merely argues that each reference individually does not show all the claimed structure and therefore cannot render the new claim unpatentable, however the argument only applies to a rejection under section 102 not 103. Clearly the improvement claimed by applicant is clearly shown to be well known in the prior art of ratchet wrenches and therefore it is not patentable.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
